Fixed Annuity

Every retirement is different, each with its own financial goals and unique needs. But, many of today's retirement objectives are the same — a reliable income source and asset protection.

That is why many Americans are turning to fixed annuities. These products have helped millions of people reach their retirement goals with benefits like tax-deferred growth, guaranteed income and principal protection.

Understanding Fixed Annuities

What is a fixed annuity?

A fixed annuity is a contract backed by the financial strength and claims-paying ability of the issuing company. This guarantees contract owners a retirement vehicle designed to protect assets while allowing for growth opportunities. It does this through a combination of powerful benefits:

- **Principal Protection**
- **Tax-Deferred Growth**
- **Liquidity**
- **May Avoid Probate**
- **Guaranteed Income**

How a fixed annuity works

This long-term retirement product is purchased with an insurance provider that, in turn, guarantees principal protection, tax-deferred growth on assets and a reliable income stream. Throughout the course of the contract, the fixed annuity earns additional interest credits based on an established rate.

Guarantee Period Continuation Options⁵

Within 30 calendar days after the end of the guarantee period, one of the following options can be chosen:

- Renew the contract for another guarantee period;
- Take a free withdrawal and apply the remaining contract value to a new guarantee period;
- Annuitize the contract and begin receiving annuity payments;
- Surrender the contract without surrender charges or market value adjustment; or
- Continue the contract without surrender charges.

If no option is chosen, the contract will automatically continue without surrender charges. Interest rates may vary each contract year, but will never be less than the

Minimum Guaranteed Interest Rate of 1%.

If the contract is continued for another guarantee period, the market value adjustment, applicable surrender charges, and surrender period apply to the new guarantee period.

Surrender Values and Charges

The annuity's Surrender Value will never be less than 90% of the premium received, less any withdrawals, accumulated at the minimum guaranteed interest rate. If a partial withdrawal or Surrender is taken during the Surrender Charge period, a deduction will be taken out according to the Surrender Charge schedule.

Market Value Adjustment (MVA)

This product includes a Market Value Adjustment (MVA) Rider. An MVA may increase or decrease the amount of a withdrawal in excess of the Free Withdrawal amount or the Surrender Value. The MVA does not apply to Free Withdrawals, any death benefit, the MGSV, or any distributions occurring after the Surrender Charge Period has ended. In general, as the MVA Index increases, Surrender Values decrease. As the MVA Index decreases, Surrender Values increase.

Enhanced Benefit Rider (Not available in CA)

The no-fee rider is added to the annuity contract by the Company and may provide additional withdrawal or surrender options.

Qualifying Nursing Care Benefit

After the first contract year, a one-time withdrawal of up to 100% of the contract value is allowed if the owner is confined to a qualified care facility for a minimum of 90 consecutive days. Confinement must begin after the contract issue date and written proof is required from both the qualified care facility and recommending physician.

Terminal Illness Benefit

After the first contract year, a one-time withdrawal of up to 100% of the contract value is allowed if the owner is diagnosed with a terminal illness. Diagnosis must occur after the contract issue date and written proof with supporting documentation is required from a qualified physician.

Death Benefit

Death Benefit proceeds are paid to the surviving joint owner. If there is no surviving joint owner, the death benefit is paid to the named beneficiary(ies) with no surrender charges. Generally paid in a lump-sum, other payment options are also available.

Tax Treatment

All income payments are considered a withdrawal from the Contract Value, and any part of the withdrawal that is deferred interest is taxable as income. If the contract is in a qualified plan the entire amount of the withdrawal may be taxable. The taxation of income payments is calculated as outlined in the Internal Revenue Code.

In addition, the taxable portion of any withdrawal taken before age 59½ may be subject to an additional penalty of 10% by the Internal Revenue Service.
